

# Homework 3

---

<b>Due</b>	Nov 27, 2022 by 11:59pm	<b>Points</b>	120	<b>Submitting</b>	a file upload
<b>File Types</b>	zip, html, and sql	<b>Available</b>	until Nov 27, 2022 at 11:59pm		

---

This assignment was locked Nov 27, 2022 at 11:59pm.

Please deploy your application on CS3, and package your project in a zip file and submit it to Canvas. The source files should include all the source code, and an HTML file `hw3.html` which contains a hyperlink to your application on the CS3 server.

---

Modify the art school application you developed in the previous homework so that it stores data in a database instead of in the application scope.

- The application must use MVC architecture, and database access must use JDBC.
- All features described in previous assignments must work; otherwise you may not receive any credit.
- In addition to the application source code, please turn in an SQL script file `hw3.sql` which contains the statements to create and populate all the tables in the database.

You may want to use the database schema in Week 11 Lab as a reference for your database design -- feel free to use/change the schema or come up with your own design.
